Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

	AUTHORS Sato, Sato, Sato, Sato, Sato, Batcot Submission JOURNAL Submisted (26-OCT-2004) Shusei Sato, Kazusa DNA Research Institute, JOURNAL Submitted (26-OCT-2004) Shusei Sato, Kazusa DNA Research Institute, Chiba, 292-08194, Japan (B-mail:seato@kazusa.or.jp, URL:http://www.kazusa.or.jp/, Tel:81-438-52-3935(ex.2337), Pax:81-438-52-3935)  * NOTE: This is a 'working draft' sequence. It currently * consists of 24 contigs. The true order of the pieces * is not known and their order in this sequence record is * arbitrary. Gaps between the contigs are represented as * runs of N, but the exact sizes of the gaps are unknown. * This record will be updated with the finished sequence	* as soon as it is available and the accession number will  * be preserved.  * 3414: contig of 3414 bp in length  * 3415	contig of 1773 gap of unknown contig of 2651 gap of unknown contig of 2511 gap of unknown contig of 2365 gap of unknown contig of 1269 gap of unknown contig of 1269 gap of unknown contig of 1368 gap of unknown contig of 1368 gap of unknown contig of 3168 gap of unknown contig of 3168	22863 34190: contid 34191 34290: gap of 34291 34886: contid 34291 38986: contid 43710 43809: gap of 43710 43809: gap of 47836 54444: contid 47936 54444: contid 54445 54444: contid 54545 60454: contid 60555 70888: contid 60555 70888: contid 70889 88088: contid 88089 70988: gap of 60559 70988: gap of 60559 70988: gap of 60550 70988: gap of 60550 70988: gap of 60550 70988: contid 88088: contid 88088: contid 88088: contid 88089 891718: contid 88088: contid

AT denotes an activation tag dissociation transposon within a single line, ET an enhancer trap dissociation transposon, GT a gene trap dissociation transposon, MT a mis-expression enhancer trap dissociation transposon, MT a defective suppressor mutator transposon. J denotes a sequence derived from the 3'end of the transposon. Genotes a sequence derived from the 5'end of the transposon BERC GARNET, ATIS project On-line seed stock requests: http://nasc.nott.ac.uk/ NASC stock code: N165059.

AT denotes an activation tag dissociation transposon within a
single line, ET an enhancer trap dissociation transposon, GT a gene
trap dissociation transposon, MT a mis-expression enhancer trap
dissociation transposon, SM a defective suppressor mutator
transposon. 3 denotes a sequence derived from the 3'end of the
transposon, 5 denotes a sequence derived from the 5'end of the
transposon BBSRC GARNEt, ATIS project

AT denotes an activation tag dissociation transposon within a
single line, ET an enhancer trap dissociation transposon, GT a gene
trap dissociation transposon, MT a mis-expression enhancer trap
dissociation transposon, MT a mis-expression enhancer trap
transposon. 3 denotes a sequence derived from the 3'end of the
transposon, 5 denotes a sequence derived from the 3'end of the
transposon BBSRC GARNet, ATIS project

AT denotes an activation tag dissociation transposon within a
single line, ET an enhancer trap dissociation transposon, GT a g
trap dissociation transposon, Ma a mis-expression enhancer trap
dissociation transposon, SM a defective suppressor mutator
transposon. 3 denotes a sequence derived from the 3'end of the
transposon, Senotes a sequence derived from the 5'end of the
transposon, Senotes a sequence derived from the 5'end of the
transposon BSRC GARNEt, ATIS project

* NOTE: This is a "working draft" sequence. It currently
* Consists of 15 contigs. The true order of the pieces
* is not known and their order in this sequence record is
* arbitrary. Gaps between the contigs are represented as
* runs of N, but the exact sizes of the gaps are unknown:
* This record will be updated with the finished sequence.

* NOTE: This is a "working draft' sequence. It currently

* Consists of 24 contigs. The true order of the pieces

* is not known and their order in this sequence record is

* arbitrary. Gaps between the contigs are represented as

* truns of N but the exact sizes of the gaps are unknown.

* This record will be updated with the finished sequence

* as soon as it is available and the accession number will

* be preserved.

genomic sequence was searched against NCBI NonRedundant Protein database
with BLASTP. ESTS represent the identified CDNA sequences using
BLASTN with the corresponding DDBJ accession no.
A gene with identity or significant homology to a protein is
classified based on the protein name to indicate the homology level
significant homology to any protein name to indicate the homology to any protein name to indicate the homology to sup protein name is classified as a "hypothetical" protein according to IRGSP standard. A gene
by two or more gene prediction programs is classified as a
probable 'hypothetical' protein according to IRGSP standard. A gene
predicted by a single gene prediction program is also classified as a
miscellaneous feature of the sequence.
The oriental of the sequence.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       The orientation of the sequence is from T7 to SP6 of the PAC clone. This sequence of P0434C04 clone has an overlap with P0408G07 (DDBJ: AP003379) clone at 5' end and an overlap with B1099D03 (DDBJ: AP003431) clone at 3' end. Detailed information on overlap and assembly quality together with annotation of this entry is available at http://rgp.dna.affrc.go.jp/GenomeSeq.html.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            /tränslation="MPFVRTLAFPTLANQIEGEIKSRTERDHGEVDLSSPEEAMSRAE

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                            US-10-780-703-2
